PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1a.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1A Rostov Army Barracks North is located approximately 5.2 kilometers north-northeast of the Rostov Railroad Bridge over the Don River [REDACTED]. It is one of many small military installations located within the limits of Rostov which is the headquarters of the North Caucasus Military District (Figure 1).

The military area occupies approximately 92 acres and contains 49 buildings, including 17 possible barracks, 3 possible administration, 1 headquarters, 1 vehicle storage, 11 miscellaneous storage, and 16 miscellaneous support build-

ings. There are also 1 athletic field and 8 miscellaneous buildings whose function cannot be determined because the area is under construction (Figures 2 and 3).

Six KEYHOLE missions of fair quality photography covered the area between [REDACTED] [REDACTED]. Comparative analysis reveals active construction within the installation. Four buildings were constructed in the summer of [REDACTED] and 1 area appears to be still under construction.
